

Worksheets

Worksheet 1

1. What is the notation for metre?
2. What is the notation for centimetre?
3. How many centimetres make 1 metre?
4. How many metres make 1 kilometre?
5. To convert metres to centimetres, we _____
6. To convert centimetres to metres, we _____
7. 5 m 12 cm = _____ cm
8. 4392 g = _____ kg _____ g
9. 7 L 280 mL = _____ mL
10. Multiply:

L	mL
16	045
x	7

Worksheet 2

1. What is the notation for kilogram?
2. What is the notation for gram?
3. How many grams make 1 kilogram?
4. To convert kilograms to grams, we _____
5. To convert grams to kilograms, we _____
6. To convert litres to millilitres, we _____
7. 1600 cm = _____ m
8. 12600 mL = _____ L _____ mL
9. Divide 48 L 8mL by 4.
10. If 1 bag of potatoes weighs 48 kg 300 g, find the weight of 8 such bags.

Answers to Worksheet 1

1. m
2. cm
3. 100
4. 1000
5. multiply metres by 100
6. divide centimetres by 100
7. 512 cm
8. 4 kg 392 g
9. 7280 mL
10. 112 L 315 mL

Answers to Worksheet 2

1. kg
2. g
3. 1000
4. multiply kilograms by 1000
5. divide kilograms by 1000
6. multiply litres by 1000
7. 16 m
8. 12 L 600 mL
9. 12 L 2 mL
10. 386 kg 400 g
